

1. Write a program to find the **largest** and **smallest** element in a tuple **without using** max() and min().
2. Write a program to count the number of **even** and **odd** numbers in a tuple.
3. Write a program to find all common elements between two tuples.
4. Write a program to create a new tuple containing only **positive numbers** from a given tuple.
5. Write a program to remove duplicate elements from a tuple while preserving the original order.
6. Write a program to separate all **even** and **odd** elements of a tuple into two different tuples.
 - Input:
 - (10,15,20,25,30)
 -
 - Output:
 - Even = (10,20,30)
 - Odd = (15,25)
7. Write a program to find the intersection of two tuples.
8. Write a program to find the union of two tuples (unique elements only).
9. Write a program to convert a nested tuple like:
Input - ((1,2), (3,4), (5,6))
into:
output -(1,2,3,4,5,6)
-
