

### Q1. Personal Profile Program

Write a Python program to store the following information using variables and display it in a well-formatted way.

- Name
- Age
- College Name
- City
- Course Name

### Q2. Student Report

Create variables for the following student details and print them:

- Student Name
- Roll Number
- Branch
- Percentage
- Passed (True/False)

### Q3. Identifier Practice

Create **10 valid identifiers** related to a college management system (for example: student\_name, roll\_no, etc.) and assign appropriate values to them.

Then print all the variables.

### Q4. Comments Practice

Write a Python program that contains:

- At least **3 single-line comments**
- **1 multi-line comment**
- A program that prints a short introduction about yourself.

#### Q5. **Correct the Errors**

Rewrite the following invalid variable names into valid Python identifiers and assign appropriate values to them.

- 2student
- student-name
- student name
- class
- for
- employee@id
